

KATA PENGANTAR

TES BUTA WARNA – versi 1.0 (dibuat berdasarkan Ishihara's Test of Color blindness)

Buku tipis ini kami buat sebagai bahan untuk menguji kemampuan penglihatan (calon) karyawan terhadap kombinasi warna.

Materi disusun berdasarkan survei sampel kecil terhadap beberapa karyawan PT Natatex Prima dan disusun mulai dari materi yang dianggap termudah sampai materi yang agak sulit.

Testing halaman terakhir (No 7-X) adalah *test gamma*, **bukan materi 'wajib'** dan hanya merupakan nilai tambah jika (calon) karyawan dapat menjawabnya.

Karena dibuat berdasarkan Concise Test (Tes Sederhana), materi ini hanya dapat memberikan indikasi adanya kelainan pada kemampuan membaca materi dalam kombinasi warna, tidak dapat menentukan jenis buta warna (misalnya: buta warna merah atau buta warna kuning).

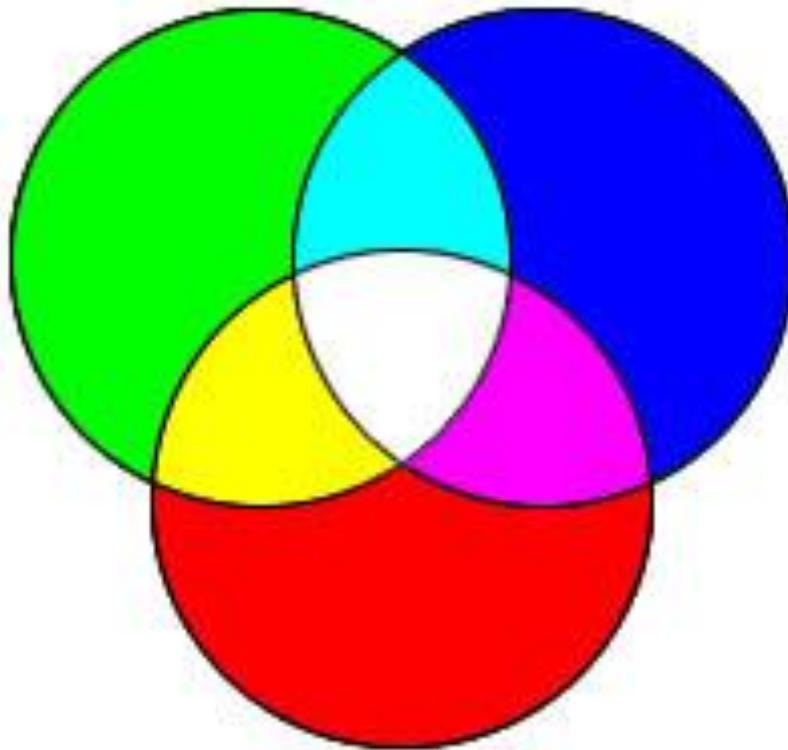

Semoga materi tipis ini dapat bermanfaat bagi penggunanya.
